

# IT Skill Trend

Lee Li Hong

13<sup>th</sup> September 2024

# OUTLINE

---

- Executive Summary
- Introduction
- Methodology
- Results
  - Visualization – Charts
  - Dashboard
- Discussion
  - Findings & Implications
- Conclusion
- Appendix

# EXECUTIVE SUMMARY

---

- Analyze and identify the most in-demand IT Skill for 2025
- Diverse data sources (job postings and industry survey)
- Key findings:
  - Top programming languages
  - Database skills in-demand
- Recommendations and actions
- Conclusion

# INTRODUCTION

---

- Technology evolves more rapidly than ever
- Organizations need to constantly explore and adopt new technologies
- Demand for programming and database skills are constantly shifting
- This project mines the most in-demand IT skills in the market for 2025

# METHODOLOGY

---

- Data sources:
  - Stack Overflow survey data
  - “Jobs on Naukri.com” from Kaggle.com
  - Skill Network cloud storage
- Data obtain through web scraping:
  - Extract from HTML and Json
  - Read file directly
- Processed, analyzed and visualized in Jupyter Notebook with Python programming language
- Create dashboard in Cognos Analytics

# RESULTS

---

# PROGRAMMING LANGUAGE TRENDS

## Current Year

Top 10 LanguageWorkedWith

## Next Year

# PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript and HTML/CSS remain the top programming languages in 2025
- Python rise to Top 3 in 2025
- Java, PHP and C++ no longer in the Top 10 in 2025

## Implications

- While JavaScript and HTML/CSS remains the most in-demand programming language, Python also becomes more important and needed by the market

# DATABASE TRENDS

## Current Year

Top 10 DatabaseWorkedWith

DatabaseWorkedWith

# DATABASE TRENDS - FINDINGS & IMPLICATIONS

---

## Findings

- MySQL and SQLite both drop in the ranking
- PostgreSQL, MongoDB and Redis rise and become the Top 3 in-demand database in 2025
- Oracle and Firebase no longer in the Top 10 in 2025

## Implications

- Relational database (PostgreSQL) remains competency in the market while
- Non-relational databases (MongoDB and Redis) become more popular in 2025

# DASHBOARD

---

# DASHBOARD TAB 3

# DISCUSSION

---

# OVERALL FINDINGS & IMPLICATIONS

---

## Findings

- JavaScript and HTML/CSS are the most in-demand programming language while Python becomes more essential
- PostgreSQL, MongoDB and Redis become the Top 3 in-demand database in 2025

## Implications

- Recruit more programmer or train existing programmer with experience and solid knowledge in JavaScript, HTML/CSS and Python to provide more comprehensive, competitive and quality IT solution, especially website development solution
- Revise the current database compatibility with current and future use, as well as the cost efficiency

# CONCLUSION

---

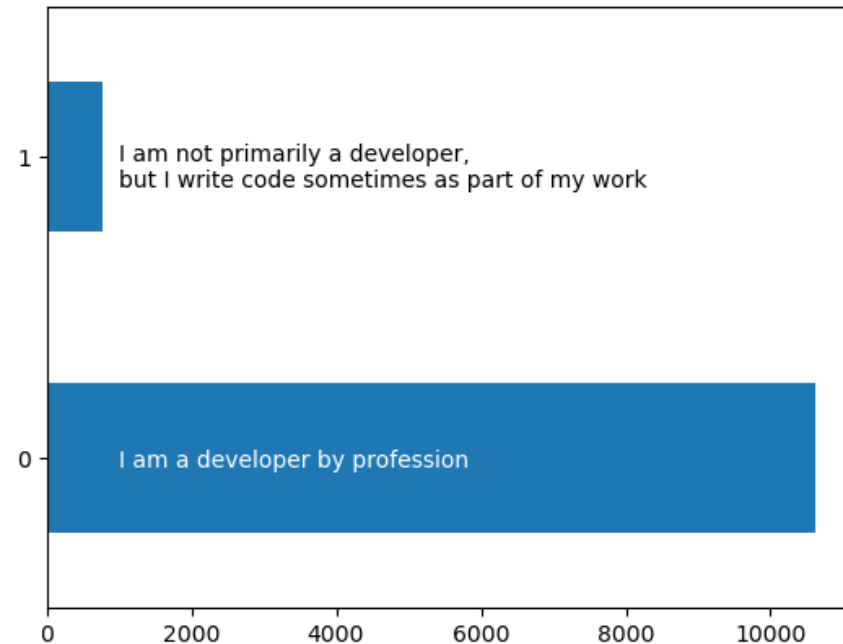

- JavaScript, HTML/CSS and Python are the utmost in-demand programming languages
- PostgreSQL, MongoDB and Redis are the potential dominant database in 2025
- Equip more professionals with the mentioned IT skills will help providing more all-rounded solution and consultancy

# APPENDIX

**Respondent Demographics - Main Branch**

# JOB POSTINGS

# POPULAR LANGUAGES

Average Annual Salary by Language

# POPULAR DATABASE

**Databases that Respondents Currently Working With (1 DB ONLY)**

# RESPONDENT SALARY

---

**Median Annual Salary for Ages from 25 to 30**

# PROGRAMMER WORKING HABIT

Median WorkWeekHrs and CodeRevHrs for the Age Group 30 to 35
